PROFESSIONAL SUMMARY

Senior full-stack engineer and technical lead (Laravel, PHP 8, Vue 3, TypeScript) with 8+ years shipping payment and SaaS systems. Multi-tenant SaaS: Built the Grow More Gaze core platform from scratch and lead its 5-person team, serving 40,000+ customers with isolated tenant data and multi-gateway payments. Fintech and payments: Core payments engineer and later team lead on SiPay for Turkish banking clients, handling 150,000+ transactions a day across merchant and mobile banking, HSM-backed cryptographic operations, and PCI-DSS-aligned card saving. Full lifecycle: Own system design, REST APIs, queues, testing, CI/CD, and production observability. Open to senior or lead remote roles.

TECHNICAL SKILLS

LANGUAGES
PHP, TypeScript, JavaScript, Python, SQL, HTML, CSS
Familiar with: Go, Rust

FRAMEWORKS
Laravel, Vue.js, Nuxt.js, React, Next.js, Inertia.js, Tailwind CSS, Livewire, Alpine.js

BACKEND & ARCHITECTURE
REST API design, System design, Queues & Horizon, Webhooks, Idempotency, PCI-DSS, Observability

DATABASES
MySQL, PostgreSQL, Redis

PRACTICES
Testing (PHPUnit, Pest), Code review, Mentoring, Agile

DEVOPS & TOOLS
Linux, Nginx, Docker, Git, GitHub Actions, CI/CD, Elasticsearch, Graylog, MQTT, Deployer

AI & AGENT ENGINEERING
OpenClaw (self-hosted AI agent runtime), MCP, LLM APIs, Prompt Engineering

EXPERIENCE

Senior Full-Stack Engineer / Technical Lead - Grow More Gaze | Oct 2023 — Present

Technical lead for a multi-tenant SaaS platform serving 40,000+ customers across 1,200+ business tenants, covering payments, payroll, and HRM.

- Built the core platform from scratch — org portfolio, HRM, payroll, invoicing, and internal email campaigns — now processing 25,000+ payroll runs a month
- Integrated 7 payment gateways (PayPal, Stripe, Paddle, crypto, PayProGlobal, bKash, Nagad) behind idempotent webhook handling, cutting duplicate-charge tickets by 90%
- Own the full lifecycle: architecture, Laravel/Vue/TypeScript dev, DB design, servers, and CI/CD; moved releases from weekly to daily with zero-downtime deploys
- Lead a team of 5 engineers: technical planning, code review, and mentoring 2 junior developers to mid-level
- Weave AI agent workflows (OpenClaw, LLM APIs) into development and operations

Senior Software Engineer - Softrobotics Bangladesh Ltd | Sep 2021 — Sep 2023

Core payments engineer on SiPay, a banking payment platform built for institutional clients.

- Developed merchant banking, mobile banking, and payment modules handling 150,000+ transactions a day
- Built diverse payment flows: link, P2P/B2B, QR, bill pay, POS, cash out, deposit/withdraw
- Scaled backend services on microservices with Elasticsearch + Graylog observability, cutting incident triage time by 60%
- Integrated HSM devices for PCI-DSS-aligned card storage, crypto operations, and key management
- Promoted to team lead for the final 4 months, leading 6 engineers through delivery of the core payment flows

Full-Stack Web Developer & Designer - Stellar BD Ltd | Oct 2019 — Aug 2021

Built HRM/payroll systems wired to IoT hardware and client web apps.

- Built core HRM, payroll, and shift modules integrated with fingerprint scanners for 8,000+ employees
- Real-time IoT sync via MQTT across 40+ attendance devices, replacing nightly manual imports
- Client websites and automation scripts in PHP, JavaScript, Python, and Web2py
- Designed responsive UIs and managed hosting end-to-end

Full-Stack Web Developer - Multiplex Web Design | Mar 2018 — Sep 2019

Delivered custom web apps for SMB clients, end-to-end.

- Handled full project lifecycles for 20+ client projects, from requirements through deployment
- Full-stack with PHP, JavaScript, MySQL, and responsive design
- Worked directly with clients on scoping, timelines, and delivery

ADDITIONAL PROJECTS

bizztechsz.com

https://bizztechsz.com

A live client platform for worldwide bulk-order quotes and company portfolios, used in production.

LaraVibe-Vue

https://github.com/thesoftpulze/laravibe-vue

An open-source Laravel starter kit with Vue 3 and Inertia.js that I maintain.

clawkit

https://github.com/ashokbaruaakas/clawkit

A Docker and AI tooling wrapper for OpenClaw, published to GHCR through automated CI/CD. 500+ image pulls.

OPEN SOURCE

Merged contributor to inertiajs/inertia-laravel (#700, the inertiaProps testing helper). Maintainer of LaraVibe Standards (Packagist package) and the LaraVibe-Vue starter kit under The SoftPulze, and of clawkit (OpenClaw Docker image on GHCR). Full timeline at ashokbaruaakas.com/open-source .

EDUCATION

BSc in Computer Science (evening program, while working full-time) — East Delta University - Chattogram, Bangladesh

2018 — 2021

Diploma in Computer Science — Bangladesh Sweden Polytechnic Institute - Kaptai, Rangamati, Bangladesh

2013 — 2017

LANGUAGES

Bengali (Native)
English (Fluent)
